Contents

MIYAMOTO, D. M. *and* CROWTHER, R. J. Formation of the notochord in living ascidian embryos 1–17

WEIJER, C. J. *and* DURSTON, A. J. Influence of cyclic AMP and hydrolysis products on cell type regulation in *Dictyostelium discoideum* 19–37

GUALANDRIS, L., ROUGE, P. *and* DUPRAT, A-M. Target cell surface glycoconjugates and neural induction in an amphibian 39–51

VERNA, J.-M. *In vitro* analysis of interactions between sensory neurons and skin: evidence for selective innervation of dermis and epidermis 53–70

DUPRAT, A-M., KAN, P., FOULQUIER, F. *and* WEBER, M. *In vitro* differentiation of neuronal precursor cells from amphibian late gastrulae:morphological, immunocytochemical studies, biosynthesis, accumulation and uptake of neurotransmitters 71–87

FALUGI, C. *and* RAINERI, M. Acetylcholinesterase (AChE) and pseudocholinesterase (BuChE) activity distribution pattern in early developing chick limbs 89–108

SWANSON, G. J. Paths taken by sensory nerve fibres in aneural chick wing buds 109–124

DAMJANOV, I., DAMJANOV, A. *and* ANDREWS, P. W. Trophectodermal carcinoma:mouse teratocarcinoma-derived tumour stem cells differentiating into trophoblastic and yolk sac elements 125–141

CAMPBELL, S. *and* BARD, J. B. L. The acellular stroma of the chick cornea inhibits melanogenesis of the neural-crest-derived cells that colonize it 143–154

KUWADA, J. Y. Pioneering and pathfinding by an identified neuron in the embryonic leech 155–167

HINCHLIFFE, J. R. *and* SANSOM, A. The distribution of the polarizing zone (ZPA) in the legbud of the chick embryo 169–175

ROSSANT, J. *and* CROY, B. A. Genetic identification of tissue of origin of cellular populations within the mouse placenta 177–189

NIJHOUT, H. F. Cautery-induced colour patterns in *Precis coenia* (Lepidoptera: Nymphalidae) 191–203

MEEK, J. *and* ADAMSON, E. D. Transferrin in foetal and adult mouse tissues: synthesis, storage and secretion 205–218

BELL, K. M. *and* McLACHLAN, J. C. Stimulation of division in mouse 3T3 cells by coculture with embryonic chick limb tissue 219–226

BLAGBURN, J. M., BEADLE, D. J. *and* SATTELLE, D. B. Development of synapses between identified sensory neurones and giant interneurones in the cockroach *Periplaneta americana* 227–246

CLEINE, J. H. *and* SLACK, J. M. W. Normal fates and states of specification of different regions in the axolotl gastula 247–269

FREEMAN, S. J. *and* BROWN, N. A. Comparative effects of cathepsin inhibitors on rat embryonic development *in vitro*. Evidence that cathepsin D is unimportant in the proteolytic function of yolk sac 271–281

HOLDER, N. *and* WEEKES, C. Regeneration of axolotl hindlimbs bearing surgically created discontinuities in the anterior–posterior axis 283–310

CHISHOLM, J. C., JOHNSON, M. H., WARREN, P. D., FLEMING, T. P. *and* PICKERING, S. J. Developmental variability within and between mouse expanding blastocysts and their ICMs 311–336
